Kratek opis

Differential pressure flow meter »FUTURA«, Size 2,
Measurement range 150 - 2000 L/min, Operating pressure 0
- 16 bar

Differential pressure measuring system for detecting
changes in flow rate or consumption and measuring energy
efficiency. There is a differential pressure at the sensor as
soon as a fluid starts to flow. Fast and accurate
measurements can be achieved in this way. This robust
instrument in a modern design offers a high level of safety
(codable) and requires no maintenance.

Accessories:

Wall bracket or alternative a mounting bracket for wall
mounting as a component of the
»FUTURA« service unit.

Wall brackets with a connection thread for mounting to an
existing compressed air system.

Joiner set for easy adaptation as a component of the
»FUTURA« service unit.

Adapter plates for adapting different »FUTURA« service unit
sizes.
