Description

- High-pressure regulating valve specially for high air flow rates
- Double nipples (G 2) required for block mounting with other devices
- Pressure setting can be locked by pushing the knob down
- Flow direction indicated by arrows
- Entry in direction of arrow
- Working pressure remains virtually **constant**, **regardless** of system pressure fluctuations and air consumption
- Separate pressure gauges for input and output pressure included, can be mounted at both ends
- Lockable adjusting knob (on request)
- Please use RIEGLER Lock AN 305-77 for sealing.
