## Recommended oil

### Special pneumatic oil 32

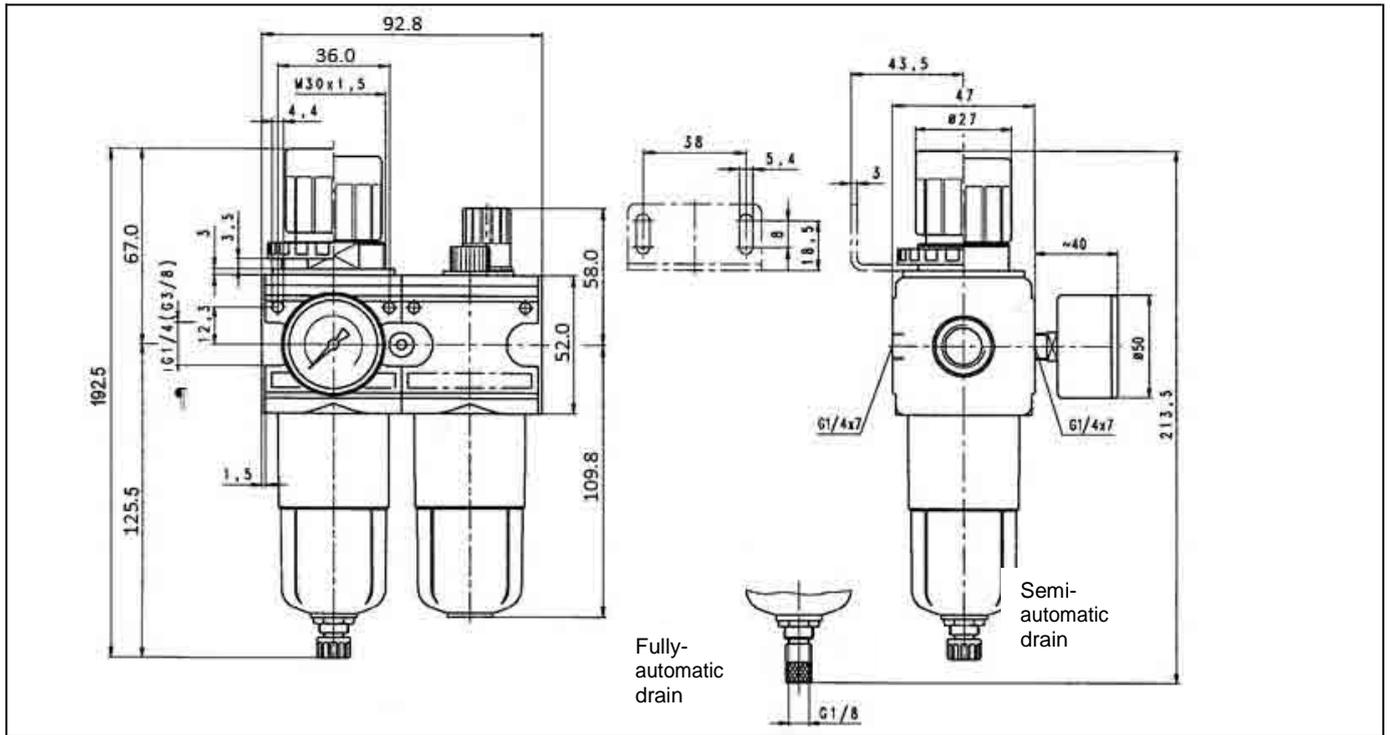

Viscosity at 40 °C: 32 cSt [mm<sup>2</sup>/s]  
Temperature range: -35 to +85 °C

Oil bowls made of plastic (polycarbonate) are corroded by additives, anti-freeze agents and synthetic oils. We therefore recommend using mineral oils from approx. 22 to 32 cSt or up to 68 cSt in conjunction with impacttools. Metal bowls and metal sight domes should be used for all other oil grades.
