Kratek opis

Polyurethane hose (PUR), Temperature -20 °C to 60 °C, Hose Ø 10x1 mm, PN at 23 °C max. 7 bar, black, Roll of 100 m
Polyurethane hoses are renowned for their extreme flexibility and correspondingly narrow bending radius across a wide temperature range.
They are more flexible even than LD-PE hoses and exhibit good abrasion resistance, very good low-temperature flexibility, only minimal permanent deformation when subjected to long-term stresses as well as good resistance to the majority of oils, greases, aliphatic hydrocarbons and oxygen.
Main applications:
- Pneumatic and hydraulic (miniature hydraulics) lines
- Mechanical engineering
- Engine construction
- Instrumentation and control
- Ideal for use with unions, as externally calibrated
