Kratek opis

Block valve pressure gauge, Taps - rotating bushing, bright brass, G 1/2, PN 25 bar, AF 27, max. 50 °C, Test flange 60x25x10

It is useful to install a stopcock as a shut-off element between the pressure gauge and the pipe.

When the lever is set to the »blow out« position, the medium is discharged into the atmosphere.

Stopcocks with a test port allow pressure gauges to be simultaneously connected to the pipe.
